A STUDY ON HEALTH PROBLEMS OF UNORGANISED WOMEN WORKERS IN CHITTOOR DISTRICT

G.SARADA¹

¹Research Scholar, Department of Economics, S.V.University, Tirupati.

Abstract

Women constitute the largest segment of India's unorganised workforce. Women's health plays an important role in determining the health of the future population because women's health has an inter-generational effect. Finally, a women's health affects the household economic well being, and as a women with poor health will be less productive in the labour force. It is against this background the current study focused on analyzing the health status of unorganised women workers in Chittoor district.

Key words: women's health, unorganised women labour, agricultural labour, domestic servant, health problems.
