### Abstract

This paper aims to present perspectives of stakeholders in their partnership on corn farming in dryland areas of North Lombok, Indonesia. In particular, perspectives are meant here as the stakeholders' expectations on the partnership. Investigating these perspectives, the study employed in-depth interviews with the stakeholders. There were 70 farmers and several stakeholders interviewed in unstructured interview mode. These primary data were complemented with secondary data from published and unpublished works. The study found that stakeholders have different perspectives on the partnership in corn farming in dryland areas of North Lombok, but common in principle of partnership, that is, to gain more from the partnership while maintaining the collaboration sustained.

**Keywords:** Partnership, Stakeholder perspective, Dryland farming, Corn farm
